AUTHOR INDEX FOR VOLUME 4 328

Journal of Anthropological Archaeology

Instructions to Authors

The *Journal of Anthropological Archaeology* publishes articles on the theory and methodology of archaeology as they relate to the understanding and explanation of the organization, operation, and evolution of human societies. The breadth of relevant subject matter is wide, therefore, extending from the earliest forms of "proto-culture" to the most complex empires and industrial nations. The range of relevant topics is similarly broad, encompassing purely theoretical modeling, archaeological and historical analyses, contemporary ethnoarchaeological studies, etc. Additionally, contributions from related disciplines such as physical anthropology, ethnology, sociology, ecology, evolutionary biology, etc., often will be germane to the interests served by the *Journal of Anthropological Archaeology*. It is the common concern with development of theory, and appropriate methodology, relevant to the explanation of human cultural systems and their evolution that brings such diverse and broadly ranging contributions together in this journal.

Manuscripts should be submitted in triplicate (one original and two photocopies), including three sets of figures to:

Robert Whallon
Journal of Anthropological Archaeology
Museum of Anthropology
University Museums Building
The University of Michigan
Ann Arbor, Michigan 48109

Failure to submit the required number of copies may delay review.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission has been approved by all of the authors and by the institution where the work was carried out. It is further understood that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Journal of Anthropological Archaeology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscripts should be written in clear and concise English and should conform to the general style of the journal and the specific instructions listed below. Manuscripts that are not adequately prepared will be returned to the authors, since it is not feasible for the Editors to revise or rewrite manuscripts. Contributors, particularly those unfamiliar with English usage, are encouraged to seek the help of colleagues in the preparation and review of manuscripts prior to submission. This practice reduces the time required for review and avoids delays in publication.

Form and Style. Manuscripts should be concise but detailed enough to permit critical appraisal. They should be typewritten and double-spaced throughout (including tables, legends, and footnotes) on one side of approximately 22 × 28-cm (8.5 × 11-in.) paper with

2.5-cm (1-in.) margins. Tables and figure legends should be typed separately and placed at the end of the manuscript. All pages, beginning with the title page and including tables and figure legends, should be numbered consecutively and fastened securely.

The title page should contain: the article title; author(s); affiliation(s); a short running title (an abbreviated form of the title) of less than 50 characters including letters and spaces; and the name and complete mailing address (and telephone number, if possible) of the person to whom proofs should be sent.

Authors are requested to include an abstract (50 to 200 words, typed on a separate page following the title page). The abstract should be a concise and informative summary that can be copied verbatim by bibliographers. The title must be suitable for indexing.

Units. Metric units should be used throughout, with English equivalents in parentheses if originally given in English units. When used in conjunction with numerals, units should be abbreviated and unpunctuated (e.g., cm, g, %). Use the *American Chemical Society Handbook* as a guide.

Numbers. Numbers less than 10,000 should be expressed without a comma (e.g., 5455) but those of greater value should have a comma or commas separating each triad of digits (e.g., 15,640; 1,200,000).

Dates. Historical dates should be expressed as years B.C. or A.D. (e.g., 1850 A.D.; 2000 B.C.). Radiocarbon dates should be expressed in ^{14}C years B.P. (before present) and should include the standard error as well as the laboratory number (e.g., 14,730 ± 150 years B.P. (Y-661)). If the dates have been corrected for atmospheric variations in radiocarbon, the calibrated dates should be reported as calendar years (e.g., 500 B.C.* or 2450 B.P.*) and the calibration table specified. K/Ar dates should also include the standard error; dates less than 1 million years old should be written out (e.g., 150,000 ± 10,000 years) but dates of a million or more years may be expressed in my (e.g., 2.43 my). If laboratory numbers have been designated, they should be given in parentheses following the date (e.g., 2.43 my (QL_k-10)).

Chemical Notation. International notation should be employed in all cases (e.g., ^{18}O, ^{14}C, ^{40}K).

Temperature Notation. Temperatures should be expressed in degrees Celsius (°C), with Fahrenheit equivalents in parentheses if originally reported in such units (e.g., 6°C; 20°C (68°F)).

Illustrations and Tables. All illustrations and tables should be cited somewhere in the body of the paper and in sequence (e.g., " . . . as illustrated in Fig. 5"; " . . . in the region (Fig. 5)"; "Figure 4 shows . . . "; " . . . in Alaska and California (Figs. 4 and 5)"; "The values in Table 6 are taken from . . ."; ". . . the data obtained in this study (Table 1)").

Footnotes. Footnotes in the *text* should be identified by superscripts consisting of Arabic numerals and should be typed on a separate sheet; footnotes in the *tables* should be identified by superscripts consisting of the lowercase letters *a, b, c,* etc., and placed at the bottom of the table.

Tables. Tables should be denoted by Arabic numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the column entries in the table.

Figures. All figures should be denoted by Arabic numerals and cited consecutively in the text, with figure legends typed on a separate sheet. Units should be clearly indicated in the figures themselves.

Please Note: All figures are to be submitted in such form as to permit photographic reproduction without retouching or redrawing, including the lettering. Lettering is reproduced as part of the figure and is not set in type. Line drawings should be carefully drafted with black India ink on white drawing paper or blue drafting cloth, if possible no larger than 22 × 28-cm (8.5 × 11-in.) overall. The lettering should be large enough to allow a 50 to 60% reduction. High-quality glossy prints are acceptable for drawings and required for photo-
